

Director of Technical Design

This is your chance to join an energetic, award-winning and growing company specializing in low/mid/high-rise multifamily residential, mixed-use and urban infill projects, with offices in Irvine and downtown Los Angeles, CA.

The Director of Technical Design (TD) is a senior-level leadership position working directly with Firm Principals and project teams to ensure that construction documents (CDs) take their role in the Firm's commitment to produce "Exceptional Housing". We are seeking proven technical leaders who are passionate and tenacious, and who will pursue our goal of delivering exceptional CDs to our large national clients with a single-minded focus.

The ideal candidate will have a Bachelor's or Master's of Architecture, Professional Registration or NCARB, and at least 10 years experience managing large, complex projects. Such project experience should be for any combination of the following building types: multifamily residential; mixed-use; institutional; civic; medical; or hospitality. Candidates must be well-organized and have excellent communication and interpersonal skills. Must have a thorough knowledge of the new California Building Code as well as Accessibility Requirements, and experience with Revit software.

This outstanding firm offers a generous benefit package, very competitive salary and a collaborative working environment.
